IN THE CLAIMS:

1 – 12 (cancelled).

13 (Previously Presented). A composition for controlling parasitic protozoa, comprising

(a) at least one substituted benzimidazol of the formula:

$$(I)$$

wherein X^1 represents chlorine or bromine,

R^1 represents hydrogen or C_1-C_4 alkyl,

R^3 represents fluoroalkyl,

R^2 represents the radical:

R^4 represents alkyl or substituted phenyl, and

R^5 represents alkyl; and

(b) at least one active compound selected from the group consisting of polyether antibiotics and

synthetic coccidiosis agents.

14 (Previously Presented). The composition of claim 13, wherein said active compound is

selected from the group consisting of Amprolium, Robenidine, Toltrazuril, Monensin,

Salinomycin and Maduramicin.

15 (Previously Presented). The composition of claim 14, wherein said active compound is

Maduramicin.

16 (Previously Presented). The composition of claim 13, wherein X^1 represents chlorine or

bromine, R^1 represents hydrogen, R^4 represents C_1-C_6 alkyl, and R^5 represents methyl or ethyl,

and said active compound is selected from the group consisting of Amprolium, Robenidine,

Toltrazuril, Monensin, Salinomycin and Maduramicin.

17 (Canceled).

18 (Newly Presented). A composition for controlling parasitic protozoa, comprising

(a) at least one substituted benzimidazol of the formula:

4

(I)
wherein X^1 represents chlorine or bromine,

R^1 represents hydrogen, ,

R^3 represents fluoroalkyl,

R^2 represents the radical:

R^4 represents C_1-C_6 alkyl, and

R^5 represents methyl or ethyl; and

(b) Maduramicin.
